SUMMIT FREERIDE

YESTERDAY. TODAY. TIMELESS.

Ski-Doo snowmobile boots, originally known simply as "Ski-Doo boots," appeared for the first time in the Bombardier outdoor clothing catalog of 1966-67. They completely revolutionized the winter footwear industry, and were all the rage not only on the snowmobile trails but also on streets and sidewalks everywhere.

BRP continues to stay the course of innovation, and now 45 years later, unveils 6 new models destined to leave their mark on their generation.

From the people who brought you winter!

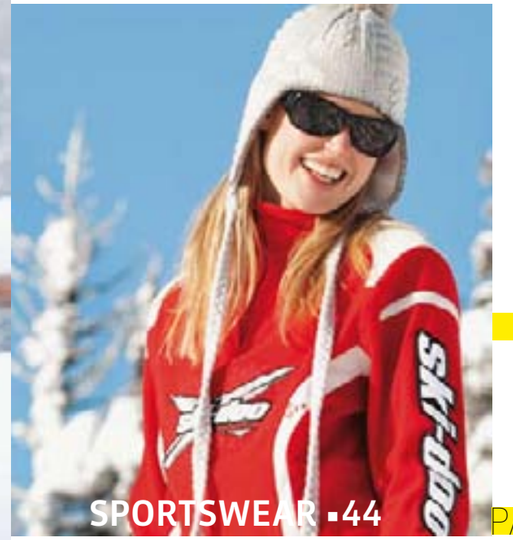

FIND OUT MORE ABOUT OUR TRAILBLAZING BOOT MODELS INSIDE THIS CATALOG ON PAGES 24, 25 AND 53, AND ON STORE.SKI-DOO.COM.

ski-doo

For advertising purposes, some scenes depicted in this brochure include professional riders and racers executing maneuvers or performances under ideal and/or controlled conditions. Do not attempt any of these or any other risky maneuvers if they're beyond your level of riding ability, as well as your understanding and respect for the performance of your snowmobile. Always ride responsibly and safely. Always observe applicable local laws and regulations. Always wear the appropriate protective clothing, including a helmet. And remember, if you're going to drink, please don't ride. Because of its ongoing commitment to product quality and innovation, Bombardier Recreational Products Inc. (BRP) reserves the right, at any time, to discontinue or change specifications, prices, designs, features, models or equipment without incurring any obligation. Some models depicted herein may include optional equipment. Prices are based on Manufacturer Suggested Retail Prices. Dealer may sell for a different price. Taxes not included. THE BEST RIDING GEAR SOLUTION

What follows is your personal riding gear selection tool to help you find your way to the trail wear that's right for you. It's based on dressing in layers, the only system experts and pros recommend for keeping dry, warm, comfortable and happy.

TYPE OF RIDER	TYPE OF UNDERWEAR
MOUNTAIN Very active	▪ Lightweight ▪ Breathable ▪ Warmth retaining
RACE Active	▪ Midweight ▪ Moisture absorbing ▪ Warmth retaining
TOURING Enduring	▪ Merino ▪ Stretch, comfortable ▪ Moisture absorbing ▪ Warmth retaining
RECREATIONAL Versatile	▪ Lightweight or Midweight ▪ Moisture absorbing ▪ Warmth retaining

BASE LAYER
THERMAL UNDERWEAR

Wearing the appropriate underwear right next to your body helps draw moisture from the skin while retaining warmth. Use the table below as your guide. See pages 50 and 51 for complete details on our full line of underwear.

MID LAYER
INSULATING FLEECES

Choose a BRP fleece to help retain even more warm air around you. Wear it under your jacket when riding. X-Team, Snowcross and Muskoka fleeces are also perfect for the cottage, the city and any moderate outdoor activity, as are our series of pants and technical fleeces.

OUTER LAYER
WATERPROOF/ BREATHABLE JACKETS

Pick from a wide range of jackets and bibs to suit your riding style. These represent your final and protective layer, which is why we've designed them to be comfortable, resistant to wind, snow and water, and to keep you warm and dry.

This year's catalog is conveniently sectioned to help you find the products matching your style at a glance, for each of our 4 Ski-Doo rider categories.

MATCH
your riding gear to your riding style.

INNER LAYERS
are just as, if not more, important that your outer layer.

DO NOT WEAR COTTON CLOTHING
like socks, t-shirts and jeans. Cotton is a fiber that soaks up sweat in seconds and takes forever to dry. Instead, use technologically advanced fibers that trap in body heat and evaporate moisture out.

VISIT YOUR AUTHORIZED BRP DEALER
for more information.

BRP TECHNICAL WEAR

ACTUALLY WICKS THE MOISTURE FROM YOUR SKIN TO KEEP YOU DRY. AND WARM. AND RIDING LONGER. WE KNOW. WE PRACTICALLY INVENTED WINTER.

1 Pick your underwear to fit your riding style/weather.

2 Wear it next to your skin for maximum performance.

3 Ride comfortably.

RIDING STYLE	CHOICE OF UNDERWEAR	WEATHER
VERY ACTIVE MOUNTAIN OR OFF TRAIL	LIGHTWEIGHT	COOL TO COLD
ENDURING TOURING	TECHNICAL MERINO	COLD TO VERY COLD
RACE OR RECREATIONAL	MIDWEIGHT	VERY COLD

LIGHTWEIGHT

MICRO POLY SPANDEX
86% Polyester, 14% Spandex

Ultra light fabric ▪ Made of high filament micro-polyester, enhanced by slight brushing to give fabric soft and luxurious touch ▪ Antibacterial finish keeps garment fresh ▪ 4-way stretch for full range of movement ▪ Breathable and traps heat in.

TECHNICAL MERINO

100% SUPERFINE MERINO WOOL
The naturally ultimate performance underwear ▪ Superfine yarn that eliminates the "itching" associated with wool garments ▪ Highly breathable heat exchange system generates heat when body temperature drops and cooling action when body temperature rises ▪ Moisture managing wicking technology, retains heat even when wet ▪ Antibacterial finish keeps garment fresh ▪ Easy care, machine washable.

MIDWEIGHT

BRUSHED NYLON SPANDEX TRICOT
80% Polyester, 20% Spandex

Brushed inner surface for warmth ▪ Moisture managing wicking technology, retains heat even when wet ▪ Antibacterial finish keeps garment fresh ▪ 4-way stretch for full range of movement.

LADIES' MUSKOKA TECHNICAL ZIP NECK
Sublimated half-zip mock neck shirt ▪ Stretchable fabric with brushed inner surface ▪ Moisture-wicking anti-odor treatment ▪ Wear as first or second layer.
91% Polyester, 9% Spandex
SIZES: S, M, L, XL, 2XL
453431 **Black (90)**

RACING TECHNICAL ZIP NECK
Sublimated half-zip mock neck shirt ▪ Stretch fabric with brushed inner surface ▪ Moisture-wicking anti-odor treatment ▪ Wear as first or second layer.
91% Polyester, 9% Spandex
SIZES M, L, XL, 2XL, 3XL
453497 **Black (90)**

SYMPATEX MEMBRANE

THE BEST LIGHTWEIGHT, BREATHABLE, WATER AND WIND PROOF RIDING GEAR SOLUTION!

Quality is the number one priority at BRP and Sympatex. BRP has been pushing the technology of its Ski-Doo Mountain and Touring gear as far as it has in its sleds.

The Sympatex membrane is the best performing on the market. **DESIGNED EXCLUSIVELY FOR THE MOST INTENSE RIDING THERE IS,** it offers waterproofness, up to 120% more breathability, is biodegradable and the most durable of all membranes. That means you don't loose technical properties as the garment ages. The degree of breathability adapts dynamically as the effort level of the rider increases.

All Sympatex products are built with a strict set of standards voluntarily applied by the manufacturer over and above industry requirements.

TESTED & CERTIFIED

RAIN CHAMBER
Up to 3 hours of continuous water testing

SEAL CHECK
Continuous rain test

WATER REPELLENCY
ISO 4920 spray tests to substantiate hydrophobicity

TEAR RESISTANCE
Sympatex membranes stretch tested up to 300%

PRESSURE
60,000 Pa pressure to validate waterproofness

MARTINDALE ABRASION TEST
For monitoring abrasion resistance and durability of materials

SympaTex®

NOW BRP AND SYMPATEX HAVE JOINED FORCES TO BRING YOU THE ULTIMATE SUIT IN THE MOUNTAIN AND TOURING SERIES. THE ADVANCED TEC HELIUM 30 AND HELIUM 50 ARE THE BEST PERFORMING SUITS ON THE MARKET FOR MOUNTAIN AND OFF TRAIL AND ABSOLUTE O THE BEST FOR TOURING APPLICATION.

All products featuring Sympatex membranes and inserts are manufactured exclusively by licensed partners. Sympatex provides its worldwide licensees with training and support on best production practices, manufacturing processes, patents and test procedures. They also test their products for workmanship, waterproofing, wind resistance, breathability and durability at their own Sympatex laboratories. All seams are sealed with original Sympatex tape to ensure the products are 100% waterproof.

TECHNICAL TERMINOLOGY

WE KEEP YOU DRY

RPM — Respiractive Performance Matrix or RPM coating exclusive to BRP Riding Gear. Delivers extremely high performance and durability for perfect climate control under even the most extreme conditions. Trademark waterproofness, windproofness and breathability required of BRP Riding Gear shell fabric developed for intensive snowmobile use and demanding riders.

RPM MAX — Same great RPM coating PLUS total seam and logo sealing. Also, added direct venting in strategic jacket areas for more efficient moisture management during intense activity.

SEAM SEALING — Seams and embroidery can act as tiny entry points through which wind and water can infiltrate. That's why Ski-Doo jackets and pants with RPM are critical seam and logo sealed. And Riding Gear with RPM Max are 100% seam and logo sealed for an even more comprehensive barrier from all the elements. The proprietary tape is also waterproof and breathable to fully seal the deal for complete performance.

SKI-DRI 2 — Ski-Dri 2 glove inserts are used for maximum breathability. They feature Porelle microporous membrane technology on the palm and an EVA (ethyl vinyl acetate) film on the outer shell. Designed to provide high performance, durable waterproofness and breathability for active applications.

HIPORA — Breathable fabric made of a three-layer microporous coating structure. First layer incorporates microscopic pores, preventing water penetration and coating peeling. Second layer consists of a honeycomb-like structure. This porous layer achieves moisture permeability and resistance to water penetration. Third layer has a very thin yet densely packed structure that increases water resistance. Three complex layers that add up to optimal comfort.

WE KEEP YOU WARM

TEFLON & TEFLON HT — Teflon provides an invisible barrier around fabric fibers to repel water and stains. In addition to retaining its water shedding properties longer than standard treatment, Teflon HT is also even more resistant to soiling and staining without altering the fabric's color, appearance, structure, texture and breathability. Good up to 20 washes compared to manufactured coatings washable only 1 to 5 times.

CRESTA BY PRIMALOFT — Primaloft Cresta offers warmth without weight and extra bulk. It is designed to keep you warm and comfortable throughout the day. — **ACTIVE + COLD**

PRIMALOFT ONE — Warmer wet or dry than any other synthetic insulation. The ultimate down-like microfiber insulation. Quick drying, soft, and breathable. Primaloft One is lightweight, compressible and thermally efficient. — **ACTIVE – VERY COLD**

PRIMALOFT ECO — All the performance you expect from Primaloft insulation and made from 50% recycled fibers. Primaloft Eco delivers lightweight warmth, breathability and water resistance for total comfort during long rides. — **ACTIVE – VERY COLD**

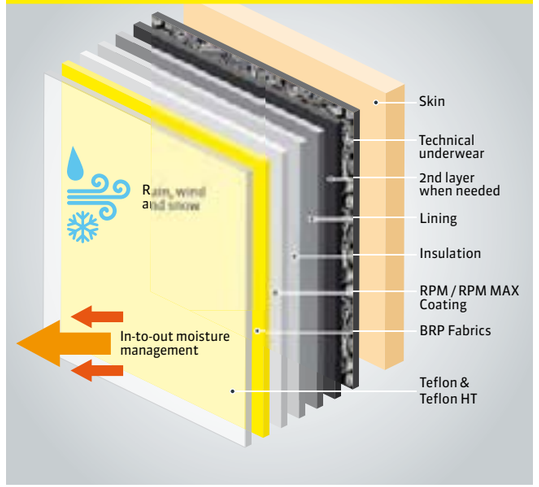

THERMOLITE — Thermolite Plus provides mid-loft lightweight insulation even in wet conditions. Easy maintenance, hypoallergenic fabric is machine washable/dryable. — **ACTIVE + COLD**

THERMAL LOFT — High-loft performance insulation that bundles extreme warmth in an excellent quality-price value package. Machine washable for hassle-free maintenance. — **ACTIVE – COLD**

WEAR THE RIGHT MIX OF LAYERS FOR A FUN, COMFORTABLE RIDE ANYWHERE.

All BRP fabrics stop outside water from penetrating in and wick inner moisture out.

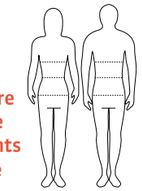

RECCO AVALANCHE RESCUE SYSTEM

The RECCO System is used by 600 rescue organizations worldwide. The small, lightweight reflector is permanently integrated into the rider's Riding Gear. Provides a simple way to equip winter enthusiasts with a basic rescue system to complement conventional companion rescue essentials such as transceivers, probes and shovels. This system is the perfect complement for F1 Focus Avalanche Transceiver users.

SIZING CHART

HOW TO MEASURE:

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

Height: Without shoes, standing with heels and back against a wall.

Chest: Along fullest part, parallel to the floor, keeping arms at sides.

Waist: Immediately below the lowest rib.

Hips: Across the fullest part of the seat.

Arm length: Hand on hip, from center back neck bone, along shoulder point, around elbow to bottom of wrist bone.

Inseam: Without shoes, from crotch to the floor.

WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is **THE CODE** you use to complete the part number on your order.
   Example: **440 227___90**
   Size: M = code "06",
   Therefore **440 227 06 90**

PARTS & ACCESSORIES

THE "X SYSTEM" ATTACHEMENT

A SKI-DOO EXCLUSIVE

- The straps attach across the front of the vehicle in an "X" eliminating the need to attach webbing underneath the sled.
- Not only does this system allow for a snug fit, it also reduces your chance of getting dirty while preparing your sled for the trailer.
- All covers feature an inner liner to protect your hood and windshield.

THE "X SYSTEM"* ATTACHMENT FOR OUR EXTREME, INTENSE, RACING AND EXPEDITION COVERS ENSURES A QUICK AND EASY INSTALLATION.

*patent pending

RACING COVER
Limited edition cover with bold racing logos ▪ Solution-dyed, UV-resistant fabric replaces traditional canvas for bold bright colors that won't fade ▪ Offers premium protection from the elements ▪ Repels water and snow ▪ Easy clean and care with water-repellent and mildew-resistant fabric that will not bleed ▪ Gas cap opening.

EXTREME COVER
Full coverage cover constructed with 600-denier solution-dyed polyester and an inner foam liner to provide extra protection for your hood and windshield ▪ Complete with gas cap opening and safety ties for trailering ▪ Easy clean and care with water-repellent and mildew-resistant fabric ▪ UV-resistant fabric ▪ Bold custom Ski-Doo silkscreened logos ▪ Graphics glow in the dark.

INTENSE COVER
600-denier solution-dyed polyester ▪ UV-resistant fabric replaces traditional canvas for bold bright colors that won't fade ▪ Built-in underliner provides excellent protection from sand and ice ▪ Offers premium protection from the elements ▪ Easy clean and care with water-repellent and mildew-resistant fabric that will not bleed ▪ Gas cap opening.

EXPEDITION COVER
Lightweight durable 300-denier solution-dyed polyester trailering cover with a built-in underliner provides excellent protection from sand and ice ▪ Custom fit complete with gas cap opening and safety ties for trailering ▪ UV-resistant fabric ▪ Easy clean and care with water-repellent and mildew-resistant fabric.

PILOT 5.7 SL SKIS (TOURING)

PILOT X 5.7 SKIS (RACE)

PILOT 6.9 SKIS (MOUNTAIN SPORT)

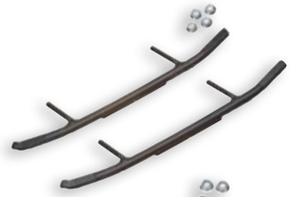

PILOT 5.7 SL SKIS	**TOURING**	Reduces steering effort and darting ▪ Specifically designed for Touring applications ▪ Skis sold individually. ›
PILOT 5.7 SKIS	**TRAIL PERFORMANCE**	Lightweight 2 runner skis with incorporated plastic bridge provides virtually effortless steering at low speeds, thanks to single carbide contact with the ground that doesn't compromise adequate and constant grip ▪ Additional carbides provide more aggressive ski handling ▪ Carbides sold separately ▪ Skis sold individually. ›
	TRAIL SPORT	Lightweight single runner skis with incorporated plastic bridge provide virtually effortless steering at low speeds, and constant grip without compromise at higher speeds ▪ Carbides sold separately ▪ Skis sold individually. ›
PILOT X 5.7 SKIS	**RACE**	Designed for aggressive riders ▪ Single long runner with aggressive ski sole ▪ Ski can be inverted to work on both the left and the right hand side ▪ Skis sold individually. ›
PILOT 6.9 SKIS	**MOUNTAIN SPORT**	Specifically designed for mountain riding, this offset design improves flotation without compromising vehicle width ▪ Skis sold individually. ›

Note: The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operator's Guide for more details.

SKI-DOO BY woody's CARBIDES

EXTENDER TRAIL III†
Pilot skis
1/2" round preformed material swedged at each end to best fix ski contour ▪ 4" of 60° turning carbide provides positive cornering control.

TRAIL BLAZER IV†
Pilot skis
1/2" round preformed material swedged at each end to best fix ski contour ▪ With 6" of 60° turning carbide, this runner is designed for trail riders looking for performance in cornering power and control.

EXECUTIVE†
Pilot skis
1/2" round preformed material swedged at each end to best fix ski contour fitted with 8" of 60° turning carbide ▪ Performance trail riders are known to use this runner ▪ Provides proper balance with a studded track.

CARBIDE RUNNER
The Dooly™ by Woodys has two 7/16" Flat-top† runners mounted on a plate for each ski ▪ Four contact lines on snow surface help decrease darting of sled as it makes own groove in trail ▪ When in a turn, only one of the Dooly bars is in contact with the snow or ice ▪ A Dooly with 4", 6" or 8" of carbide on both runners provides the same turning power as a single runner with 4", 6" or 8" of turning carbide ▪ Sold individually.

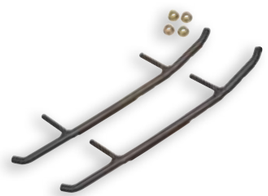

Pilot skis
860200443 ▪ Preformed 4" 60°

860200513 ▪ Preformed 6" 60°

860200514 ▪ Preformed 8" 60°

286 PHANTOM

STUD AND BACKER KIT

One Piece Studs
Choice of Champions

manufactured by woody's

Visit your local Ski-Doo dealer to determine the best set-up for your sled.

THE ONLY APPROVED TRACTION AVAILABLE FOR YOUR REV-XP AND REV-XR SKI-DOO SNOWMOBILES.

286 PHANTOM SERIES STUDS & SUPPORT PLATES BY WOODY'S

A complete line of traction products developed specifically for Ski-Doo's REV-XP & REV-XR RipSaw Lite tracks • Due to the unique track design, this is the **only traction product** available to maintain track warranty and track life • Kit complete with stud, nut, and support plate • The only traction product approved by BRP for the REV-XP & REV-XR platforms.

415129279 **5/16 – 1.075" Pack of 84 (for 120" track)**

415129282 **5/16 – 1.325" Pack of 84 (for 120" track)**

415129280 **5/16 – 1.075" Pack of 96 (for 137" track)**

415129283 **5/16 – 1.325" Pack of 96 (for 137" track)**

415129281 **5/16 – 1.075" Pack of 500**

415129284 **5/16 – 1.325" Pack of 500**

woody's

Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit.

BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2011 Ski-Doo snowmobiles. Look for this symbol on your track.

Note: The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operator's Guide for more details.

PERFORMANCE DRIVE BELTS

- High Performance drive belts calibrated to maximize your sled's performance.
- Aramid tensile cords used in construction for extra long life and dependability, it also deliver a consistent length with minimal belt shrinkage and minimal length adjustments.
- High tensile reinforced fiber elastomer undercords provide minimal dusting and long term flex life.
- Flexweave overcord for superior adhesion and crack resistance.
- Consistent performance during life of belt.
- Quality you can count on for optimum performance.
- Built with distinctive durability features for mountain, trail or fast tracks.

860200276

NSK is the proud sponsor of the Warnert Racing team and official bearing supplier for the entire Ski-Doo racing program.

THERE ARE PROMISES AND THERE IS ACTUAL PROOF.

INTRODUCING PROOF.

Bearings make virtually the entire world go round. But only one ball bearing brand the world over is so superior and so far ahead of the competition, it's the one we use and recommend at BRP. NSK ball bearings are the best, and you can ask for them by name at all participating BRP dealers.

WHY IS NSK THE UNDISPUTED GLOBAL LEADER IN BALL BEARINGS? PRIMARILY THANKS TO:

Advanced sealing technology featuring patented light-contact seals that resist contamination in the toughest environments, while delivering higher-level performance.

Crown cage uniquely designed and made from advanced engineered plastics (polyamide) that help extend grease life, while reducing noise and power loss in the bearing.

Advanced lubricant technology that is synthetic, water-repellent, rust-resistant and eco-friendly.

Superior steels vacuum degassed and freed from impurities to extend bearing life by up to 80% over conventional steels.

Wear results after 300 hours

NSK
Impeccable condition

COMPETING BRAND
Severe rust corrosion

Next Generation Lubricants

XPS

YEARS OF DEVELOPMENT AND THOUSANDS OF MILES HAVE YIELDED TRULY NEXT GENERATION LUBRICANTS!

EXAMPLES

600 SDI PLATFORM — After 18,000 km, or approximately 11,000 miles, the pistons looked like new and no RAVE service was required. The engine was ready to continue for several additional miles.

E-TEC PLATFORM — With competing oils, the RAVEs generally need cleaning at 100 hours to address sticking concerns. At 100 hours using the XPS semi-synthetic oil, the RAVEs were considerably cleaner, fully functional, and did not require service.

PHYSICAL EVIDENCE

COMPETING OIL
200 HOURS

XPS SEMI-SYNTHETIC
300 HOURS

Considerable wear to coating

Very little to no wear to piston coating

SMALL END ROD WEAR — Grinding marks and running line grey stains required polishing out after 200 hours using a competing oil. Grinding marks were intact after 300 hours with the XPS semi-synthetic oil.

Competing Oil - 200 HOURS

XPS Semi-Synthetic - 300 HOURS

A RIDER
ESSENTIAL

XPS 2-STROKE SYNTHETIC BLEND OIL

Premium 2-stroke synthetic blend ▪ This 2-stroke synthetic blend formulation was developed specifically for Rotax E-TEC , SDI and Power T.E.K.™ engines and delivers ultimate performance ▪ It extends engine life and reduces smoke emissions and combustion deposits compared to conventional oils.

1 quart / 946 ml 293600100
1 US gallon / 3.785 L 293600101

XPS 2-STROKE MINERAL OIL

Formulated and developed to work specifically in an oil injection environment ▪ Flows at -40 °C (-40 °F) and offers optimal lubrication at all running temperatures for carbureted engines ▪ Can also be used as a pre-mix.

1 quart / 946 ml 293600117
1 US gallon / 3.785 L 293600118

XPS 2-STROKE SYNTHETIC OIL

A uniquely formulated low-ash 2-stroke fully synthetic injection oil ▪ It meets the specific lubrication requirements of Ski-Doo snowmobiles equipped with Rotax carbureted and SDI 2-stroke engines.

1 quart / 946 ml 293600132
1 US gallon / 3.785 L 293600133

XPS 4-STROKE SYNTHETIC OIL - ALL CLIMATE GRADE

Unlike other ordinary 4-stroke motor oils, XPS synthetic 4-stroke oil is specifically engineered to meet the particular lubrication requirements of Ski-Doo snowmobiles equipped with Rotax 4-TEC 4-stroke engines ▪ Provides easier starting in very cold temperatures.

1 quart / 946 ml 293600112
1 US gallon / 3.785 L 293600115

MAINTENANCE AND OIL CHANGE KIT

Maintenance and oil change kit for Ski-Doo 1200 4-TEC™ engine ▪ Kit includes: 1 gallon of XPS synthetic oil, oil filter, o-rings, 3 NGK spark plugs and instruction sheet.

415129404

XPS PREMIX OIL

Superior performance 2-stroke oil developed especially for Rotax 2-stroke engines ▪ Formulated for fast and easy mixing at very cold temperatures.

500 ml 293600120

Note: Please contact your nearest dealer for suggested retail prices of oil based products.

XPS MINERAL CHAINCASE OIL
Dependable mineral-base chaincase protection.

250 ml 415129500

XPS LUBE
A multipurpose lubricant that prevents rust, corrosion and moisture intrusion ▪ Contains active extreme-pressure additives which provide excellent lubrication and antiwear properties ▪ Comes in a spray can that works upside down.

14 oz. 293600016

XPS STORAGE OIL
This specialty oil is a must when putting your Ski-Doo away in the spring ▪ Specially formulated to protect the engine's internal parts from the hazards of rust and corrosion due to condensation during storage or prolonged periods of non-use.

350 g 413711900

HPG SHOCK OIL
Developed for your Ski-Doo snowmobile rebuildable HPG shocks ▪ Impedes foaming which reduces shock fade.

1 L 293600035

XPS SYNTHETIC CHAINCASE OIL
The best in multigrade chain lubrication, specifically developed for our high performance models ▪ Offers wide operating range of temperatures.

355 ml 293600138

XPS SUSPENSION GREASE
Specially designed for Ski-Doo snowmobile and Can-Am ATV suspensions ▪ Offers optimal lubrication at low and high temperature while protecting critical suspension components from dirt and other contaminants.

400 g 293550033

PULLEY FLANGE CLEANER
Easy-to-use cleaner specifically developed to quickly remove gunk and grime from primary and secondary pulley flanges ▪ No rinsing required.

320 g 413711809

HEAVY-DUTY CLEANER
A very strong cleaner with a citrus smell for specific jobs such as engine degreasing where you need a strong product to remove grease, oil and grime ▪ Developed specifically to clean plastic snowmobile body parts.

400 g 293110001

XPS MICROFIBER TOWELS
Made up of extremely fine fibres, their soft surfaces have been perfected for drying and polishing boats, motorcycles, cars or any shiny finish ▪ XPS Microfiber Towels are so absorbent they hold up to seven times their weight in water ▪ Machine washable means they can be used over and over again.

Pack of 2 219701759

XPS SPRAY CLEANER & POLISH
Removes road grime, dirt, grease and bugs from land vehicles as well as scum lines and water marks from snowmobile ▪ Spray on then buff out, without water ▪ When used as directed, it leaves a showroom shine that protects against sun damage, ozone damage and dirt accumulation ▪ Works great on painted surfaces, fibreglass, chrome and plastics found on your watercraft, motorcycles, snowmobiles and more.

14 oz. / 397 g 219701706

A RIDER
ESSENTIAL

XPS PWC, SNOWMOBILE AND ROADSTER QUICK DETAILING KIT
Kits includes: spray cleaner & polish and 2 microfiber towels.

219701714

FUEL STABILIZER
Fuel additive to protect against fuel contamination and residue build-up in carburetors and gas lines ▪ Should always be used before storing your snowmobile ▪ Suitable for all gasoline engines.

8 oz. 413408601

PRE-MIXED ANTIFREEZE/ COOLANT
Pre-mixed ready to top up your coolant level ▪ Blended to perform best in our Rotax engines with an anti-corrosive additive.

1 quart / 946 ml 219700362

PLASTIC SCRATCH REMOVER KIT
Great for all plastic components such as windshields and hoods ▪ Includes 3 products: fine and heavy scratch remover, plastic cleaner and shine ▪ To use on all plastic and vinyl surfaces of your sled ▪ Great around the shop and the house.

861774800

CASTROL† GT LMA BRAKE FLUID
(Not illustrated)

Exceeds DOT 3 and 4 requirements ▪ Unique low-moisture formulation provides maximum protection against vapor lock ▪ Recommended in Ski-Doo snowmobiles and Can-Am ATVs.

354 ml 293600062

CASTROL SRF BRAKE FLUID
(Not illustrated)

Exceptionally high dry boiling point ▪ Superior anti-lock properties ▪ Exclusive European Formula.

1 quart / 946 ml 293600063

FLEXIBLE SPOUT
To use on your 1 quart / 946 ml and 1 US gallon / 3.785 L oil bottle for spill-free pouring ▪ Easy installation.

414837300
